Determination of defects – rectification necessary within three weeks

Object: Lindenstraße 123, 30283 Hannover, (May Mustermann)
Gas meter number: 1234567890123456789

Hello,

during the adjustment of your gas appliances, a defect was found in the following gas appliance:

«HERSTELLER», «TYP», «GERAETEART»

Details of this can be found in the defect report with the number <<MK123456>>>, which we left on the gas appliance. You will also find the most important information on the enclosed extract from the defect report. Before we can properly adjust your gas appliances, the defect must be corrected by a contract installation company by **00.00.0000**.

If we do not receive a defect settlement card, we will be forced to **block your gas connection** as of **00.00.0000** due to the imminent conversion to H-gas, in accordance with § 24 number 1 of the Low Pressure Connection Ordinance (NDAV). We will not announce the blockage again.

What you must do

If the appliance does not belong to you, please contact the owner (landlord, administrator, etc.) so that the defect can be rectified. However, we would like to point out that, in addition to the owner of the gas appliances/the gas installation, you are also jointly responsible for the proper operation of the gas installation. We have informed the owner of your property about the necessary steps in a separate letter.

If you are the owner of the device, please have the defect repaired by a contract installation company. After the order has been completed, the contract installation company will fill out the defect completion card. Please return it to us by the above-mentioned date by mail or e-mail to info@mein-h-gas.de. We will then inform you about the next steps in another letter.
